

Environmental Management System

Course Outline

Internal Auditing Training

APRIL 2025

Delivered by:

MF Management Services

Course Overview

Being eco-friendly is high on many businesses' agendas. Not a day goes by without reminders in the news about the damaging effect that we are all having on the planet. However, many businesses struggle to know exactly what they can do in practical terms to reduce their impact and contribute to a more sustainable future.

With the increase in environmental legislation businesses can adapt through different methods but what can be done in a practical basis to maintain and improve.

An effective Environmental Management System can help organisations manage their impact on the environment and improve the performance of their business.

One important part of improvement is the vital role that Internal Auditors play in assessing the conformity and effectiveness of this system and through direct evidence of opportunities to improve.

Through a series of workshops and interactive tutorials, this 3 day certified Internal EMS Auditor training course will teach you how to conduct environmental management system audits for effectiveness, improvement and to determine compliance with the international standard for environmental management systems, ISO 14001:2015.

Delegates are assessed by a combination of continuous assessment and an open book end of course examination.

How to book your course:

1	Visit: www.isosystems.org.uk/internal-auditor-training
2	Complete the online form
3	A member of our team will get in touch

Course Objectives

The main objectives cover the following areas:

- To gain the specialist knowledge and skills needed to prepare, conduct, report and follow up on EMS audits in an effective and competent manner and that adds value to the business.
- Provide the knowledge and understanding of the **ISO 14001:2015** related standards (including other management system standards) and how to use the standards effectively when involved in EMS Audits.

Who should attend?

The course is designed for the following:

1. Existing EMS internal Auditors who require update training due to the implementation of **ISO 14001:2015**.
2. EMS staff who have never been involved in Internal Auditing and wish to broaden their skills and knowledge.
3. EMS professionals wishing to upgrade their CPD.
4. New auditors.

Target Industries

Key attendees would be involved in diverse industries such as Construction, Waste Management, Chemical, Agriculture, Water, Public Services, Fishing, Manufacturing, Marine etc. All industries that have a significant or strong legislative impact on the Environment.

Benefits of EMS Training

Will equip all attendees with the following:

1. Thorough understanding of the processes involved with auditing an **ISO 14001:2015** EMS.
2. How to identify areas of concern and areas for improvement.
3. How to reduce Risk and re-occurrences of problems.
4. How to align an EMS with the **ISO 14001:2015** standard.
